1. First of all, you need to know the "**IP Address**" of your box:
   a. Go to "**NETWORK**" shortcut:

   b. Select the "**LAN Settings**" option (if you are connected by LAN) or "**WIFI Settings**" (if you are connected by WIFI):

   c. The "**IP Address**" option shows the number that you need to input in the "**Address Bar**" of your browser:

2. Input the "**IP Address**" of your box in the "**Address Bar**" of your browser and press "**ENTER**" in your keyboard to access to the "**WEB INTERFACE**":

3. Select to the first option "**IPTV Settings**" and then it will go menu with the "**QTV ONLINE (Stalker)**" and "**XTREAM**":

4. Once there you select your protocol ("**QTV ONLINE (Stalker)**" or "**XTREAM**"), and input the data of your service and save it. When you enter to that protocol in your box it will open and work with your service account.
